で安全・快適な地下室

A solidly built (strong and unbreakable) and safe basement

放射性ヨウ化メチル99.999%除去を達成した

質*を99.999%除去

放射性ヨウ化メチルの捕集効率99.999%を達成した特殊フィルタを採用することで実現しました。 ※放射性ヨウ化メチル

10 III X Underground NBC* Shelters are used in the case of and during natural disasters such as earthquakes, typhoons, wildfires, etc. and fallouts of radioactive contaminants or chemical pollutants.

TM NBC* Underground Shelters are equipped with highly efficient (HEPA/ULPA/Activated carbon fiber filter) Air Filtration Systems.

[*NBC stands for Nuclear/Biological/Chemical]

This kind of air filtration system is equipped with filters that achieve 99.999% filtration of radioactive, biological and chemical contaminants and pollutants.

TM放射性物質除去機能付 空気清浄機に搭載!

福島原発事故の 処理で採用された 特殊フィルタ

この特殊フィルタは原子炉建屋内に充満 した放射性ヨウ素ガスを高効率で捕集除 去し、事故の終息に向けて多大な貢献をし たと高く評価されました。

日本全国の原子力発電所周辺の一時避難 施設等に多数採用されています。

This kind of air filtration system is equipped with filters that achieve 99.999% filtration of radioactive, biological and chemical contaminants and pollutants.

TM air filtration system is equipped with activated carbon fiber filters. These filters filter out micron-sized (0.3; PM2.5) etc. pollutants and contaminants.

Activated carbon fiber filters are a feature of emergency shelters operated by Nuclear Reactors Plants in Japan. Activated carbon fiber filters were useful in the reduction of casualties during the 2011 Fukushima Nuclear Reactor Disaster.

省スペースな空間に充分な装備で、 大切な家族の命を守る Space-saving and fully equipped.Protecting the lives of our precious families.

 TM NBC Underground Shelters are equipped with highly efficient (HEPA/ULPA/Act
- carbon fiber filter) Air Filtration Systems. [NBC stands for Nuclear/Biological/Che Walls made from (galvanized/corrugated) metal

標準品

- ●AC100Vコンセント
- ●非常灯

TN放射性物質除去 機能例充気清净機

- ●便座セットの簡易トイレ
- TM放射性物質除去機能付空気清浄機
- ●特殊バルブシステム配管
- ●ポータブル電源 (2000W)

Standard Equipment

- TM Air purifier with radioactive substance removal function
 Blast Valve Air Filtration System. (The primary ventilation system inside the cabin is
- achieved by a blast pressure valve. This blast valve utilizes the positive pressure
- Portable power supply (2000W)

オプション

- ●防災防水BOX
- ●太陽光発電用ソーラーパネル&蓄電池(12V)、 および予備蓄電池(ポータブル電源100V)
- ●外部監視カメラ
- ●折り畳み式ソファーベッド
- ●インターホン
- ●原子力災害対策用特殊マスク(非常用として5枚設置)
- ●冷暖房エアコン(電源は一般家庭用から引き込み)

※地下シェルターの埋設工事、一般家庭用からの電源の引き込み工事は別途

Optional Equipment

Ground Level Unit (Disaster prevention waterproof unit)

- Panel for solar power generation 12V and spare storage battery (portable power supply 100V)
 An external camera
 a collapsible sofa/bed to maximize space.
 Intercom
- Special mask for nuclear disaster countermeasures (5 spects installed for emergency)
- Air conditioner (power supply is pulled in from general household use)

*The cost of Installation of underground construction and electricity infrastructure Is not included.

Ultra high air filtration utilizes the positive pressure mechanism

Positive pressure is a state where the pressure is higher than the outside. Positive pressure is achieved by increasing the amount of air supplied to the room more than the amount discharged. By supplying the purified air to the room with an air supply fan, the air pressure in the room is increased, and radioactive materials and dust are prevented from entering through gaps in the room. Air purification by positive pressure is used in medical facilities where a hygienic environment is required as well as in food and precision equipment factories.

A western style toilet bowl with a seat cover. Highly airtight bags and deodorizers keep

あらゆる災害から命を守るために

TM地下シェルターは天神製作所が研究、設計し、製造する地下シェルターです。

自然災害には火山の噴火、地震、津波、地滑り、台風や洪水などの風水害などがあります。そして今や、原子力災害、ミサイルの飛来など自然災害以外の災害も起こることがあり得ます。これらの突発的な災害によって人の命や社会的活動に被害が生じます。

天神製作所は、あらゆる災害から身を守ることができる地下シェルターを開発しました。家庭用として設置しやすい小型設計で、地下埋め込み式のため、避難時の安全をより確保できます。さらに、大きな商業施設や幼稚園の園児、学校の児童・生徒、医療機関の入院患者、社会福祉の入所者等が避難できるよう、オーダーメイドいたします。

To protect lives from all kinds of disasters

TM Underground Shelter is an underground shelter that we research, design, and manufacture.

Natural disasters include volcanic eruptions, earthquakes, tsunamis, landslides, typhoons, floods and other wind and flood damage. Now, non-natural disasters such as nuclear disasters and missile strikes are also possible. These sudden disasters can cause damage to human lives and social activities.

We have developed an underground shelter that can protect you from all kinds of disasters. It is designed to be small enough to be easily installed for home use, and is embedded underground to provide greater safety during evacuation. In addition, it can be tailor-made to evacuate children in large commercial facilities and kindergartens, students in schools, hospitalized patients in medical institutions, and residents in social welfare facilities.

構造計算書

信頼できる安全性

TM地下シェルターは、構造設計・計算によって作成された 構造計算書があります。TM地下シェルターの設計が、固定 荷重・積載荷重・積雪荷重・風荷重・地震荷重などに対して安 全であり、また使用上支障がないことが確認できています。

確認済証

Confirmed certificate

TM地下シェルターは、 建築基準法第6条第1 項の規定による確認が 取れました。

TM NBC Underground Shelter complies with the (national/prefectural) Standard Building Construction Laws and has been approved by the Ministry of Land, Infrastructure, Transport and Tourism of Japan. (JIS) Article 6, Paragraph 1.

Reliable safety

TM NBC Underground Shelter has a structural calculation sheet created by structural design and calculation. It has been confirmed that the design of the TM underground shelter is safe against fixed loads, loaded loads, snow loads, wind loads, seismic loads, etc., and that there is no problem in use.

TM地下シェルター 体験談

台風の時にTM地下シェルターへ避難して実体験しました。外は強風と大雨。しかし、TM地下シェルター内は外が嵐だとは思えない静けさでした。テレビカメラで外の様子を見ることができたので、嵐が過ぎ去って安全を確認してからシェルターを出ました。

TM NBC Underground Shelter experience story

I experienced this firsthand by evacuating to the TM NBC Underground Shelter during a typhoon. Outside, there were strong winds and heavy rain. However, it was so quiet inside the TM NBC Underground Shelter that it was hard to believe that it was a storm outside. We were able to see what was going on outside through TV cameras, so we left the shelter after the storm had passed and we were sure it was safe.

TM 地下シェルター内のモニターで 撮影した写真です。

TM 地下シェルター内は とても静かでした。
